Standup

David	- Adjusted the scenario generation workflow to make it more lightweight. Still some impediments like unreliableJonas.
Finn	- finished the last version of Email design
Jonas	- Integrated PoC agents, still have to create the DB agent. Impediment: Request takes too long. Keeps working with Oussama to resolve this
Ousama	- Oussama: Compared his research workflow with the research workflow of Jonas. Created a MR for that. Keeps working with Jonas. Additonally, he Implemented the new interface.
Manel	
Imen	- Tested crawler with complex sites, still some problems, like CAPTCHAs. Added multi-threading for faster performance.
Luca	- Tested Server Sent Events, created a MR for that, which was already reviewed by Finn.
